Media Release

GUERNSEY AIRPORT – AVIATION ACTIVITIES

Guernsey Airport wishes to advise members of the public that there will be a number of special aviation activities centred around Guernsey Airport this week (7-11 September 2009). As a result there will be some additional aircraft noise around the island during these dates, particularly around the airport, and around the south and west coast of the island.

The activities include parachute drops, the Battle of Britain Air Display, and visits by military aircraft (current and historic).

Airport Management is striving to keep the disruption to an absolute minimum; however the public's patience during this week of additional aerial activity is greatly appreciated.
